#### **Content Validation**

Thank you for reviewing post-completion GHE participant survey (PS-TP2). Your feedback will be used for the content validation (e.g., inter-rater agreement) of the survey. You can obtain more detailed information about the assess context and research background in the document of assessment context. Please check the questionnaire of PS-TP2 for item writing and open questions.

#### Part 1

The construct of this study is: <u>subjective perception about the satisfaction with the training program support for GHE</u>. In the questions below

- **Relevance**: to what extent, do domains or indicators are related to program orientation and supports from the training program to GHE,
- **Representativeness**: to what extent, do domains or indicators cover *all* the territory of the constructs or domain.

Please use this scale in response to the questions below.

- SD=Strongly Disagree (major change needed)
- D=**Disagree** (some modifications needed)
- A=Agree (no modifications needed but could be improved with minor changes)
- SA=Strongly Agree (no modifications needed)

### **Box 2: content validation**

| Domains  |    |     |   |    |
|--|----|-----|---|----|
| The seven domains appropriately address the construct in |    |     |   |    |
| terms of <u>relevance</u> .                              |    |     |   |    |

|  | .1 | . 1 |   |    |

Suggestion for modification (i.e., any domain is not relevant to the construct or need modification?)

| The seven domains appropriately address the construct in terms of representativeness. | SD | D | A | SA |
|---|----|---|---|----|
| Suggestion for modification (i.e., any domain is ignored?)                            |    |   |   |    |

#### Part 2

The following questions focus on the content validation at item/sub-indicator level. The analyses are focusing on three aspects:

- **Relevance**: to what extent, do the items/sub-indicators related to the corresponding domain in terms of program orientation and supports from the training program;
- Clarity: to what extent, are the items/sub-indicators clear and easy to understand;
- **Importance**: to what extent, are the items/sub-indicators important for measuring the corresponding domain.

Please use this scale in response to the questions below.

- Relevant Scale:
  - 1 = Not relevant; 2 = Somewhat relevant; 3 = Quite relevant; 4 = Very relevant
- Clarity Scale:
  - 1 = Not clear; 2 = Item needs some revision; 3 = Very clear
- Importance Scale:
  - 1 = Not useful nor essential; 2 = Useful but not essential; 3 = Essential

| Items/Sub-indicators validati   | on                |                  |                         |
|---|-------------------|------------------|-------------------------|
| 1. Cultural Competency  |                   |                  |                         |

## Part 3

The following questions focus on the content validation open-ended questions, item writing, and other feedbacks.

Please use this scale in response to the questions below.

- SD=Strongly Disagree (major change needed)
- D=**Disagree** (some modifications needed)
- A=Agree (no modifications needed but could be improved with minor changes)
- SA=Strongly Agree (no modifications needed)

| Open-end Questions   |               |           |         |    |
|--|---------------|-----------|---------|----|
| The open-ended items appropriately address the construct in terms of <u>relevance</u> .          | SD            | D         | A       | SA |
| Suggestion for modification (i.e., any sub-indicator that are not modification?)                 | relevant to t | he domaii | n or ne | ed |
| The open-ended items appropriately address the construct in terms of <u>representativeness</u> . | SD            | D         | A       | SA |
| Suggestion for modification (i.e., any sub-indicator is ignored?)                                |               |           |         |    |
| Item Writing The closed-ended items are clear in wording, format, or directions                  | SD            | D         | A       | SA |
| Suggestion for modification  |               |           |         |    |
| The open-ended items are clear in wording, format, or directions                                 | SD            | D         | A       | SA |
| Suggestion for modification  |               |           |         |    |

| Other Feedbacks                       |
|---------------------------------------|
| Suggestion for any other modification |
|                                       |
|                                       |
|                                       |
|                                       |
|                                       |
